Inside Intermac Stone is ALL IN ONE

Pesaro, 15 March 2018
Inside Intermac Stone, the event dedicated to specialists in the stone processing sector, is now underway, coinciding with the announcement of "ALL IN ONE", the partnership between Intermac, Donatoni Macchine and Montresor that unites technological excellence and a widespread distribution network under a single banner, with a view to supporting customers as they build their intelligent factories.

For three days, from 15 to 17 March, customers and visitors will have the opportunity to experience the most advanced technologies for stone and sintered materials first hand, through live demos and interactions with highly qualified staff.
One of the new developments for this year is the presence of Montresor technologies, embodied by the Luna range - a practical, innovative line of toroidal edge polishers - and Vela 7.2, the vertical edge polisher for polishing flat edges of granite, quartz, ceramic and marble to a mirror finish.
There are also three new solutions dedicated to the latest-generation sintered materials: the technologies of the Genius RS-A benches, the Busetti double-edged grinding systems and the Movetro handling and storage systems.
These solutions cover each of the various stages of machining: handling, cutting and finishing. From today and for the duration of the event, it will also be possible to take part in the Live the Experience tour, an unmissable opportunity to discover all of the new and exciting features that make up this event. The first stop on the tour provides visitors with an exclusive preview of Sophia, the IoT platform that offers a wide range of services for simplifying and rationalising the work management process. We will then continue, leading guests on a discovery of the Academy, the Made in Intermac training project designed to spread technological expertise and corporate culture to staff, dealers and customers alike. The tour ends with an overview of the production process, to provide an understanding of how Intermac has applied the principles of lean production.

Surf the experience! - Inside Intermac Stone is also the stage upon which the new website will be launched, officially live from 12 March: a new, fully redesigned online presence, created to ensure maximum ease of navigation and allow customers to find tailored solutions to meet their needs.

Diamut – Tooling Division
Even more innovation. The current range of tools dedicated to machining sintered materials has now been further extended, with the creation of additional technologies capable of performing different machining operations with machining centres. In a dedicated corner, visitors to the event will be greeted by technicians and sales staff.

Share your experience at Inside Intermac Stone with the hashtag #IntermacNow.

Intermac is the Biesse Group division that handles the production and sale of equipment and systems for machining glass, stone and metal. Established in Pesaro in 1987 by Giancarlo Selci, it rapidly managed to achieve a leadership position in the sectors it operates in and has earned the trust of successful companies that operate in a variety of industrial sectors, from construction to interior design and from the automotive to the aviation industry. Through a vast and extensive distribution network of branches, dealers and agents, Intermac offers attentive, personalised assistance to customers, from pre-sales consultation to after-sales and spare parts services. The majority of the brand's manufacturing activities take place at the Intermac plants in Pesaro and Dongguan (in China), where the company's production area spans around 30,000 square metres, employing more than 300 people.

Donatoni Macchine. The company was founded 50 years ago in Domegliara, in the province of Verona, an area recognised worldwide as one of the key centres for stone machining. The quality and reliability of the products that the company produces have enabled Donatoni Macchine to establish a presence on the majority of foreign markets, thanks to a highly-efficient commercial network and consistent attendance at the major international trade fairs and events. From Europe to the United States, from South America to North Africa and from Arab to Asian markets, Donatoni Macchine is synonymous with innovation and precision.

Montresor & C. s.r.l. Since the sixties, the company, which is based in Villafranca (VR), has been producing, marketing and installing edge-polishing machines for finishing marble, granite, porcelain and synthetic materials. The extremely high levels of specialist knowledge acquired over the years coupled with a continuous focus on technological research have made the Montresor brand synonymous with excellence among manufacturers of edge-polishing machines.

BIESSE S.p.A. - Biesse Group is a global leader in wood, glass, stone, plastic, and metal processing technology. It designs, manufactures, and distributes machines, integrated systems, and software for manufacturers of furniture, door/window frames, and components for the construction, ship-building, and aerospace industries. It invests an average of 14 million Euro per year in R&D, boasting over 200 registered patents. It operates through 9 industrial sites, 37 branches, and 300 agents and selected dealers, exporting 90% of its production. Its customers include some of the most prestigious names in Italian and international design. Founded in Pesaro in 1969 by Giancarlo Selci, Biesse SpA has been listed in the STAR segment of the Italian Stock Exchange since June 2001, and is currently included in the FTSE IT Mid Cap index. It currently has 3800 employees worldwide.
